

Fitness Audio VHF/UHF Front Mount Antenna Kit Installation Upgrade

Front & Rear View of non-upgraded system

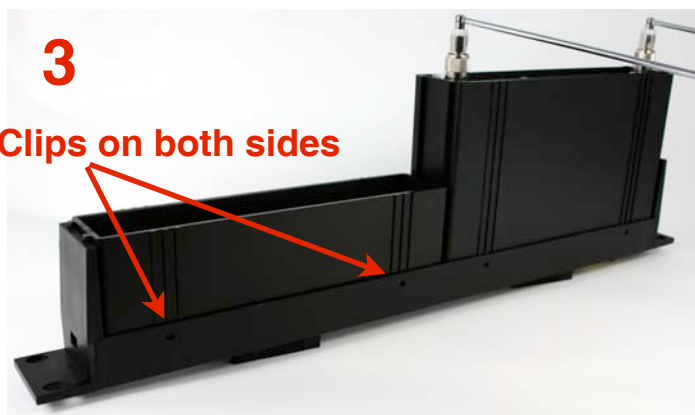

From **This** to **This** - For better reception with metal cases and rooms with wireless hazards

Removal of Blank Filler Panel

1. Disconnect the power supply and audio output cable from the back of the FA Wireless Receiver. Remove the antennas.
2. Remove the 4 screws from the front of the system to remove the Fitness Audio Wireless system from the Sound System Rack.
3. The Blank Filler Panel is held in by 4 built-in clips on the top and bottom of the rack and filler panel as well as 4 'V' notched slides on the ends of the Filler Panel.
4. Gently lift the Rack Mount Rail in the middle of the Blank Filler Panel on the top and bottom with your fingers to loosen the Blank while pushing the Face of the Blank panel backwards with your thumbs.
5. Apply Gentle Even pressure and the Blank Filler Panel will slide out

3
Clips on both sides

4
Fingers Here - Gently Lift until Clips Disengage

Thumbs Here - Gently Push the Face of the Panel

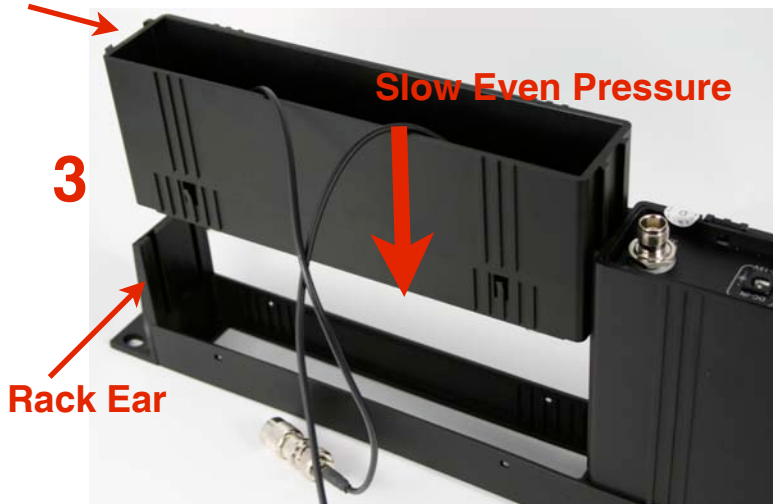

5
Apply Gentle Even Pressure
Until Panel is Removed

Installation of Fitness Audio VHF/UHF Antenna Front Mount Filler Panel

1. Get Front Antenna Mount Filler Panel (FAMFP) and remove both antenna couplers (if on the face of the FAMFP).
2. Line up the side of the FAMFP with the side of the FA Receiver - Pair the Grooves on the side of the FAMFP to the FA Receiver - They should be Paired as one side small to one side large - Note: It doesn't matter which is small or large as long as they join together.
3. As you slide them together apply slow even pressure - be careful not to twist the mount. Align the Outside Grooves with the Rack Ear - it will slide in.

Outside Grooves

4. Apply Slow Even Pressure until the FAMFP Clicks into Place.

5. Install Couplers on the Back of the Receiver.
6. Install the Extension Wires to the coupler
7. Remount the FA Wireless System in the Sound System Rack.
8. Attach the Antennas on the FAMFP
